4 Automatic Provisioning, Live SMTP Test & Redirect to Your /t/ Command Center
5 Add Your First Candidate Profile
6 Fine-Tune Search Keywords, Per-Country Job Boards
7 Pick from All 12 ATS CV Designs, Custom Accents & Attach Certificates
8 Inspect the Live Multi-Page A4 Preview
10 Your Daily Command Overview
11 Rounds View
12 Inspect the Application Drawer, Download Apply Packs & Tap Approve & Send
14 Manage Your Plan, Notifications, Reference Search & 3-Rail Support Desk

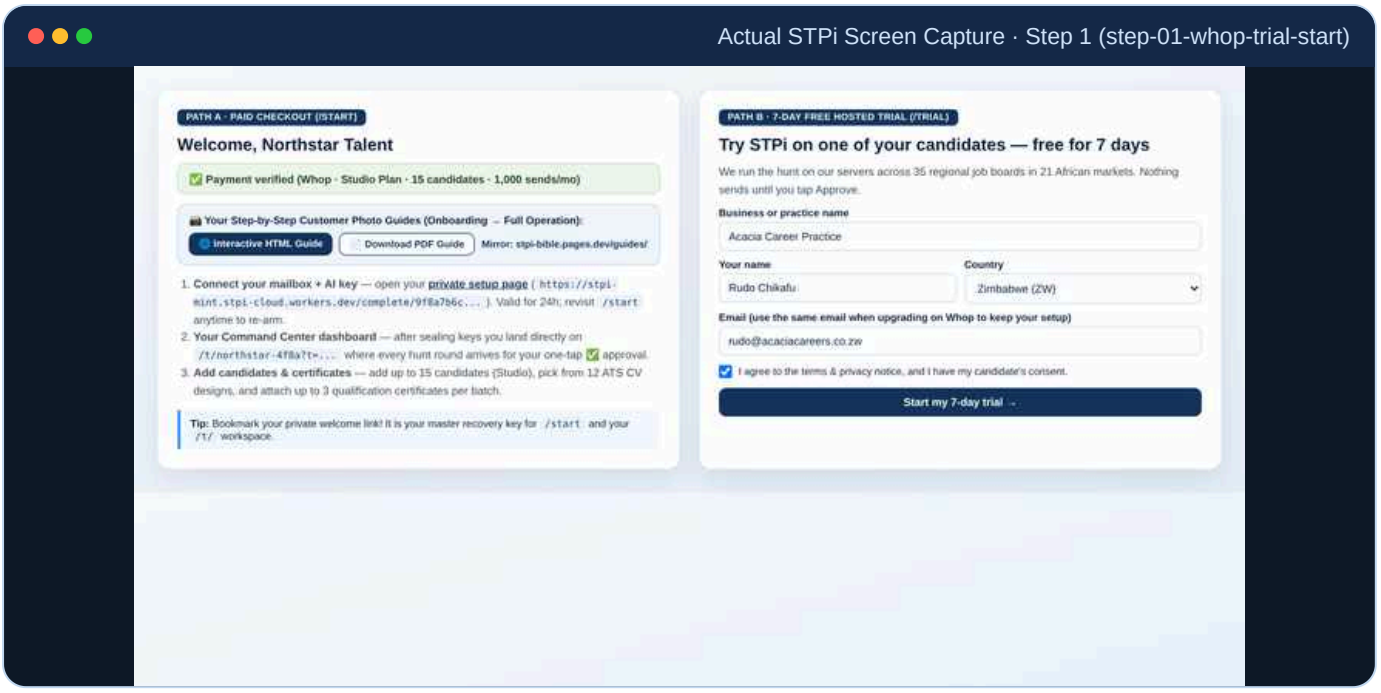

Part 1 · Onboarding & Activation

STEP 1 OF 16

Activate Your Workspace (/start) or Start a 7-Day Free Trial (/trial)

SOLO STUDIO SOVEREIGN DFY SETUP TRIAL

> **What you see on screen:** Immediately after purchasing any plan on Whop (Solo, Studio, Sovereign, Done-For-You $49/mo, or Executive CV Setup $19) — or signing up at /trial — you receive your private welcome link (/start?t=<check_token>). Opening it displays your Customer Photo Guides (Interactive HTML + PDF) and arms your 24-hour private setup link (/complete/<enroll_token>).

STEP-BY-STEP INSTRUCTIONS

1. Open the private welcome link supplied after checkout (`https://stpi-mint.stpi-cloud.workers.dev/start?t=<your_token>`) and enter the exact email address you used at checkout.
2. Starting a 7-Day Free Trial instead? Visit `https://stpi-mint.stpi-cloud.workers.dev/trial` , enter your practice name, your name, email, and primary country, and click **Start my 7-day trial**.
3. Download or open your **Interactive HTML Photo Guide** and **PDF Photo Guide** from the blue banner at the top of the welcome screen.
4. Click **private setup page** (`/complete/<token>`) to proceed to Step 2 and Step 3.

REAL EXAMPLE · AGENCY BUYER VS. TRIAL USER

- Studio Buyer: Thandiwe buys STPi Studio ($613/mo) on Whop using `placements@northstartalent.co.za` . She opens her `/start?t=...` link, enters `placements@northstartalent.co.za` , and clicks her armed `/complete/...` link.
- Trial User: Rudo signs up at `/trial` with `rudo@acaciacareers.co.zw` . Later, when

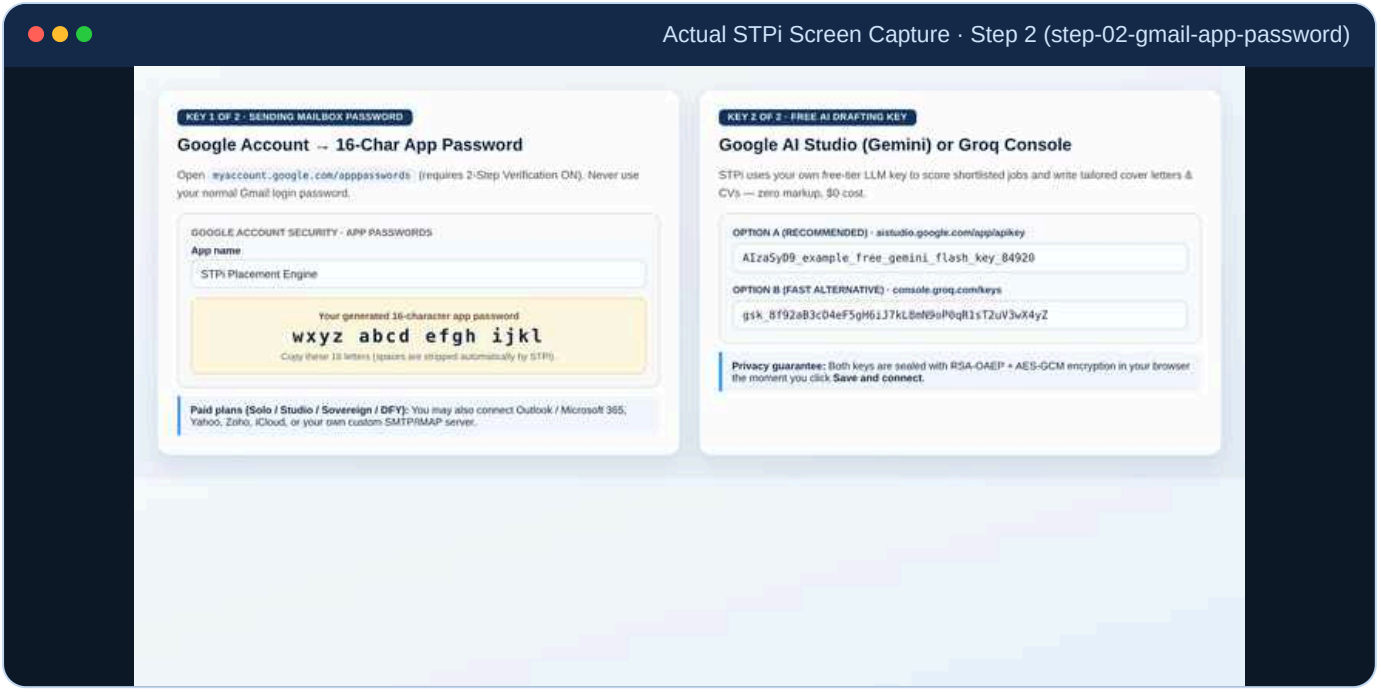

she buys Solo on Whop with that same email, STPi automatically upgrades her trial workspace in place — keeping every candidate and draft.

STEP 2 OF 16

Create Your 16-Character Gmail App Password & Free AI Key (Gemini or Groq)

SOLO STUDIO SOVEREIGN DFY SETUP TRIAL DEMO

> **What you see on screen:** STPi sends applications from your own mailbox (so replies go straight to you and your candidate) and uses your own free-tier AI key (Google AI Studio Gemini or Groq) so you never pay per-draft markups.

STEP-BY-STEP INSTRUCTIONS

1. **Create your Gmail App Password (2 minutes):** Open `https://myaccount.google.com/apppasswords` (ensure 2-Step Verification is switched ON first). Type `STPi` as the app name, click **Create**, and copy the 16-character password (`wxyz abcd efgh ijkl`). Never paste your regular Google account password.
2. **Create your Free AI Key (1 minute):** Open `https://aistudio.google.com/app/apikey` (Google Gemini — recommended) or `https://console.groq.com/keys` (Groq). Click **Create API key** — no credit card required — and copy the key (`AIza...` or `gsk_...`).
3. **Paid Plan Non-Gmail Mailboxes:** On Solo, Studio, Sovereign, Done-For-You, and CV Setup, you can also use Outlook / Microsoft 365, Yahoo, Zoho, iCloud, or your own custom SMTP/IMAP server.

REAL EXAMPLE · WHAT VALID KEYS LOOK LIKE

```
• Mailbox Address: placements@northstartalent.co.za (or simalidudu@gmail.com)
• Gmail App Password: wxyz abcd efgh ijkl (16 letters; spaces are stripped automatically)
```

• Gemini API Key: `AIzaSyD9_example_free_gemini_flash_key_84920` (or Groq: `gsk_8f92aB3c...`)

STEP 3 OF 16

Complete Your Private Setup Form (/complete/<token>) & Seal Your Keys

SOLO STUDIO SOVEREIGN DFY SETUP TRIAL

> **What you see on screen:** The `/complete/<token>` page collects your brand name, primary country, contact details, sending mailbox credentials, AI key, and optional custom sender domain. All credentials are encrypted end-to-end (RSA-OAEP + AES-256-GCM) before leaving your browser.

STEP-BY-STEP INSTRUCTIONS

1. **Section 1 · Your business:** Enter your **Brand name** (printed on candidate CVs on Studio/Sovereign), select your **Country** across our 16 SADC + 5 East/Island markets (`ZA, ZW, ZM, NA, TZ, MW, BW, LS, SZ, XB, AO, KE, CD, RW, BI, UG`), and enter your name and WhatsApp number.
2. **Section 2 · Sending keys:** Select your mailbox provider (`Gmail` , `Outlook` , `Yahoo` , `Zoho` , `iCloud` , or `My own SMTP/IMAP server`), enter the mailbox address, paste your 16-character App Password, and paste your Gemini or Groq API key.
3. **Section 3 · Your own domain (Optional, Paid Plans):** Expand Section 3 if you want every candidate to send from `candidate.name@yourdomain.co.za` via free Brevo (300/day), SMTP2GO (1,000/mo), or your own SMTP server.
4. Tick the consent confirmation checkbox and click **Save and connect**.

REAL EXAMPLE · OWN-DOMAIN SENDING FOR AN AGENCY

- Brand Name: `Northstar Talent` · Country: `ZA (South Africa)`
- Section 2 Reply Inbox: `placements@northstartalent.co.za` (receives all employer replies via catch-all)

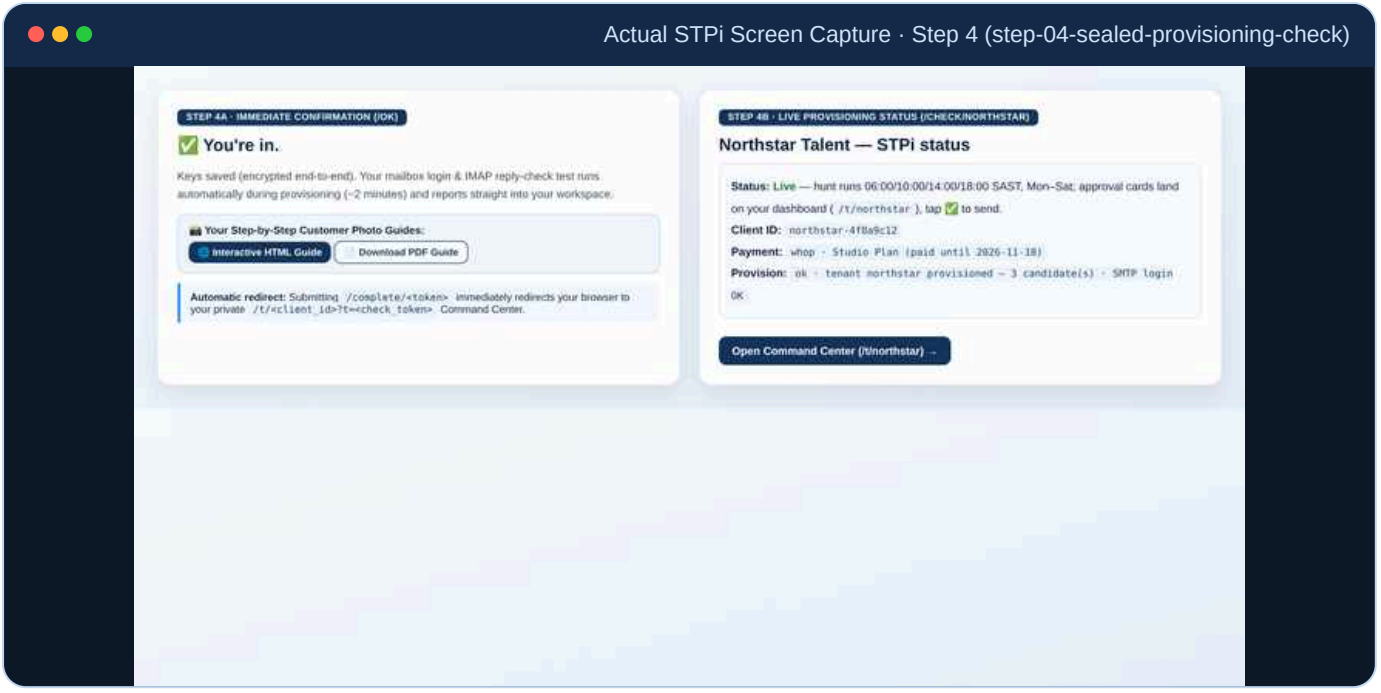

• Section 3 Custom Domain: `northstartalent.co.za` via `Brevo relay` → Maya's applications send from `maya.ndlovu@northstartalent.co.za`.

STEP 4 OF 16

Automatic Provisioning, Live SMTP Test & Redirect to Your /t/ Command Center

SOLO STUDIO SOVEREIGN DFY SETUP TRIAL

> **What you see on screen:** As soon as you click Save and connect, your single-use `/complete/<token>` link is consumed, STPi dispatches the provisioning runner (`provision.yml`), tests your SMTP & IMAP login live, and redirects your browser straight to `/t/<client_id>?t=<check_token>` .

STEP-BY-STEP INSTRUCTIONS

1. Wait ~60–120 seconds while provisioning seals your tenant configuration and runs a live SMTP/IMAP login check against your mailbox.
2. Check your status anytime at `/check/<client_id>?t=<check_token>` or on the top status strip of your `/t/<client_id>` Command Center.
3. If your mailbox test shows a warning, open **Settings** → **Mailbox** in your dashboard to re-verify your 16-character App Password with one click.

REAL EXAMPLE · PROVISIONING STATUS OUTPUT

```
Status: Live — hunt runs 06:00/10:00/14:00/18:00 SAST, Mon–Sat
Provision: ok · tenant northstar provisioned · SMTP login OK · IMAP reply-check OK
```

Part 2 · Candidate Profiles, CVs & Certificates (#settings)

STEP 5 OF 16

Add Your First Candidate Profile (+ Add profile in Settings)

SOLO STUDIO SOVEREIGN DFY SETUP TRIAL

> **What you see on screen:** Inside your `/t/<id>` workspace, click **Settings** in the left navigation rail and click **+ Add profile**. The inline candidate creation form opens with multi-country/city chips, target job titles, avoid-words, and CV file upload (`.pdf` , `.docx` , `.txt` , `.md` , `.rtf` up to 8 MB).

STEP-BY-STEP INSTRUCTIONS

1. Click **Settings** in the left sidebar (or top mobile bar), then click **+ Add profile**.
2. Enter the candidate's **Full name** and **Email address** (they receive a Bcc copy and Reply-To on every approved application).
3. Click one or more **Countries they will hunt in** (`South Africa` , `Zimbabwe` , `Zambia` , `Namibia` , `Botswana` , `Kenya` , etc.), then click individual **Cities** or **All of <Country>**.
4. Type comma-separated **Job titles they want** (e.g., `Programme Officer, M&E Officer, Project Coordinator`) and **Titles to avoid** (e.g., `Director, Intern, Unpaid, Sales Rep`).
5. Attach their base **CV file** (`.pdf` , `.docx` , or `.txt`) or paste their full CV text, then click **Add profile**.

REAL EXAMPLE · ADDING CANDIDATE MAYA NDLOVU

- Full name: `Maya Ndlovu` · Email: `maya.ndlovu@example.com`
- Countries: `Zimbabwe (ZW)` + `South Africa (ZA)` · Cities: `Harare, Bulawayo, Johannesburg`
- Job titles they want: `Programme Officer, M&E Officer, Monitoring and Evaluation Specialist`

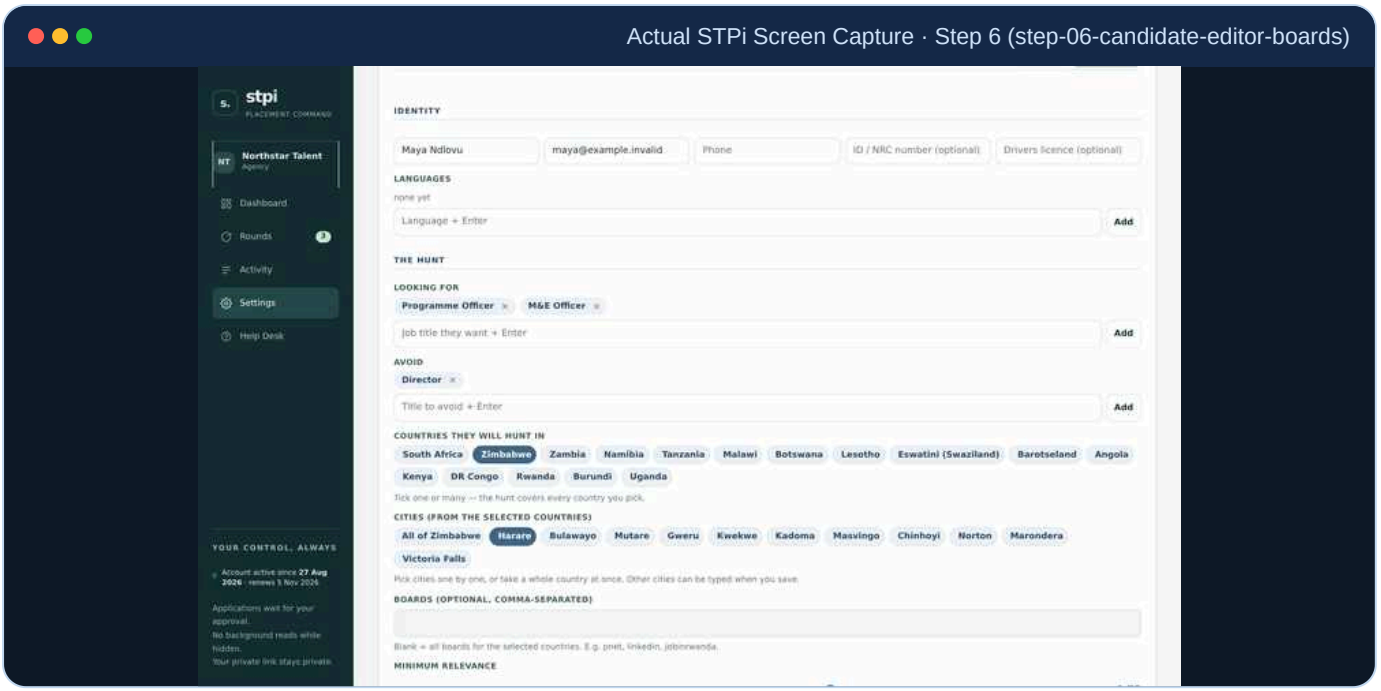

• Titles to avoid: `Director, Chief, Intern, Volunteer` · CV File: `Maya_Ndlovu_Base_CV.pdf`

STEP 6 OF 16

Fine-Tune Search Keywords, Per-Country Job Boards (35 Boards) & Relevance Slider

SOLO STUDIO SOVEREIGN DFY SETUP TRIAL

> **What you see on screen:** Clicking **Edit** on any candidate card opens the comprehensive single-screen Candidate Editor (`#pf-name`). Here you control identity details (including optional ZA ID number / driver's licence), multi-country locations, minimum relevance score (50%–90%), per-country job boards, and structured CV experience/education.

STEP-BY-STEP INSTRUCTIONS

1. On any candidate card in **Settings** → **Profiles**, click **Edit**.
2. Add or remove **Wanted job titles** and **Words to avoid** using the interactive chip inputs (`#addkw` , `#addav`). One well-chosen avoid word (like `Senior` or `Intern`) filters out dozens of noisy ads.
3. Adjust the **Minimum match score** slider (`#rg-min` , default `72%`). Lowering to `62%–68%` widens the funnel in smaller markets; raising to `78%+` keeps only tightly matched vacancies.
4. Select specific **Job boards** (or leave all ticked for full country coverage across all 35 board families: `PNet` , `CareerJunction` , `Careers24` , `JobMail` , `MyJobMag` , `VacancyMail` , `NGOJobBoard` , `ReliefWeb` , `Classifieds ZW` , `JobsZM` , `GoZambiaJobs` , regional newspapers, and remote boards).
5. Review or edit the structured **Summary**, **Skills**, **Experience**, and **Education** fields, then click **Save changes**.

REAL EXAMPLE · CONFIGURING CANDIDATE 3 (LERATO) FOR ACCOUNTING ROLES

- Wanted titles: `Senior Accounts Clerk, Bookkeeper, Assistant Accountant`
- Avoid words: `Audit Partner, Trainee, Internship` · Min Relevance: `70%`

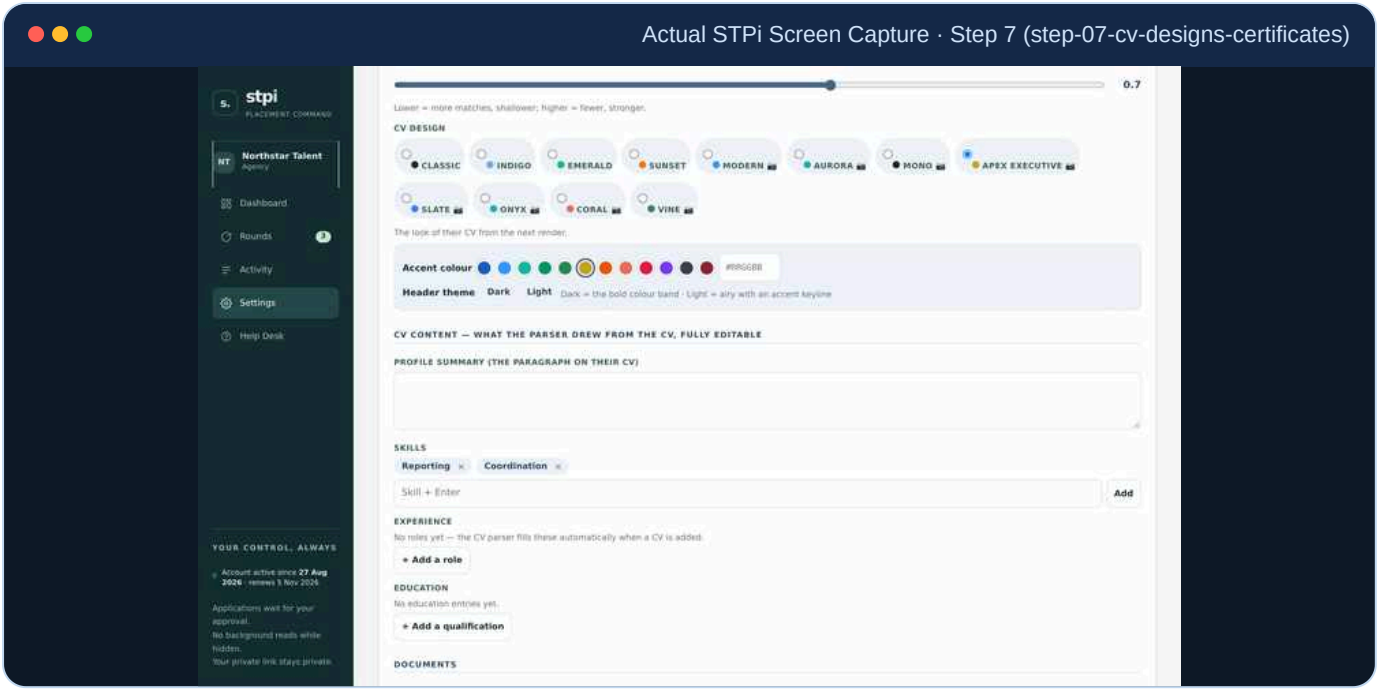

• Boards: `careerjunction, pnet, careers24, myjobmag` · CV Design: `Apex Executive` (`#C9A227` gold accent)

STEP 7 OF 16

Pick from All 12 ATS CV Designs, Custom Accents & Attach Certificates (Up to 3 per Batch)

SOLO STUDIO SOVEREIGN DFY SETUP TRIAL DEMO

> **What you see on screen:** Every candidate card features one-click swatches for all 12 ATS-parseable CV designs (`Classic` , `Indigo` , `Emerald` , `Sunset` , `Modern` , `Aurora` , `Mono` , `Apex Executive` , `Slate` , `Onyx` , `Coral` , `Vine`), plus buttons for **CV**, **Certificates**, **Photo**, and **Mailbox**.

STEP-BY-STEP INSTRUCTIONS

1. **Pick a CV Design:** Click any of the 12 design swatches on the candidate card (or inside Edit Profile) to switch their CV look immediately. Modern (`Modern` , `Aurora` , `Mono`) and Executive (`Apex` , `Slate` , `Onyx` , `Coral` , `Vine`) designs also unlock **Custom Accent Colours** (`#RRGGBB`) and **Dark / Light Header Themes**.
2. **Attach Qualification Certificates (Mandatory before sending):** Click **Certificates** on the candidate card, select up to **3 files at a time** (`.pdf` , `.jpg` , `.png` , up to 8 MB each), and click **Attach**. Need more than 3 certificates? Simply click **Certificates** again — new files merge automatically by filename!
3. **Optional Headshot Photo:** Click **Photo** to attach a `.jpg` / `.png` / `.webp` portrait for the photo-slot CV designs (`Modern` , `Aurora` , `Mono` , `Apex` , `Slate` , `Onyx` , `Coral` , `Vine`).

REAL EXAMPLE · MERGING 5 CERTIFICATES IN TWO BATCHES

- Batch 1: Select `BSc_Hons_Degree.pdf` , `Project_Management_Cert.pdf` , and `Drivers_Licence.pdf` → Click **Attach**.
- Batch 2: Click **Certificates** again (leave 'Replace current set' unticked) → Select

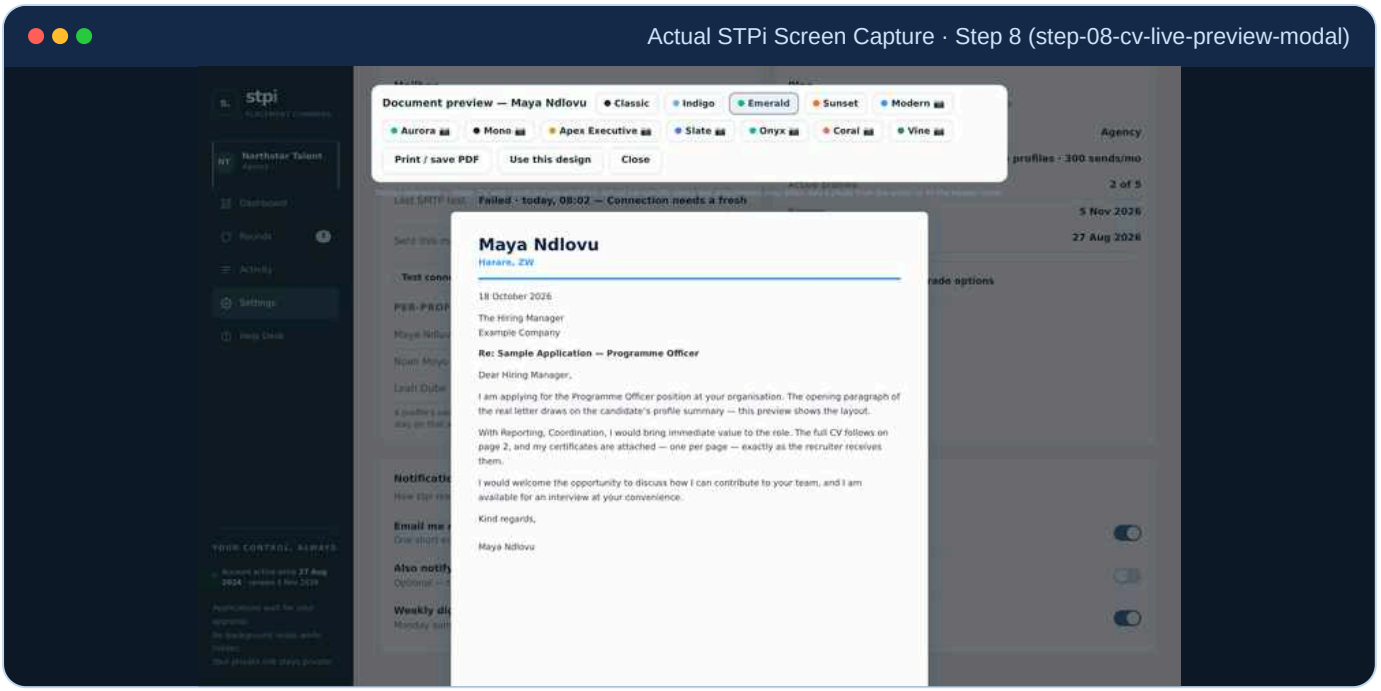

`SHEQ_Diploma.pdf` and `First_Aid.pdf` → Click **Attach**. All 5 certificates now ride with every application!

STEP 8 OF 16

Inspect the Live Multi-Page A4 Preview (Cover Letter + Tailored CV + Certificates)

SOLO STUDIO SOVEREIGN DFY SETUP TRIAL DEMO

> **What you see on screen:** Clicking **Preview CV & pack** opens the interactive full-screen Document Preview Modal (`#pvwrap`). It renders Page 1 (the business-plain Cover Letter), Page 2 (the styled A4 CV in your chosen theme, accent, and Dark/Light header mode), and Page 3+ (each attached qualification certificate on its own page).

STEP-BY-STEP INSTRUCTIONS

1. On any candidate card in **Settings**, click **Preview CV & pack**.
2. Click through all **12 CV design pills** across the top of the preview bar (`Classic` through `Vine`), test **Accent colour dots**, and toggle **Dark / Light header** to compare styles live.
3. Click **Use this design for <Candidate>** to lock in your favourite look for all future applications.
4. Press `Escape` or click **Close** to return to your workspace without losing your scroll position.

REAL EXAMPLE · CHOOSING BETWEEN EMERALD, MODERN & APEX EXECUTIVE

• NGO / Development Roles (`Maya Ndlovu`): `Emerald` or `Vine` with Light header.
• Corporate Finance / Executive Roles (`Lerato Mokoena`): `Apex Executive` with `#C9A227` gold accent & Dark band.
• Engineering / Tech Roles (`Noah Moyo`): `Modern` or `Slate` with `#2E9BFF` cobalt accent.

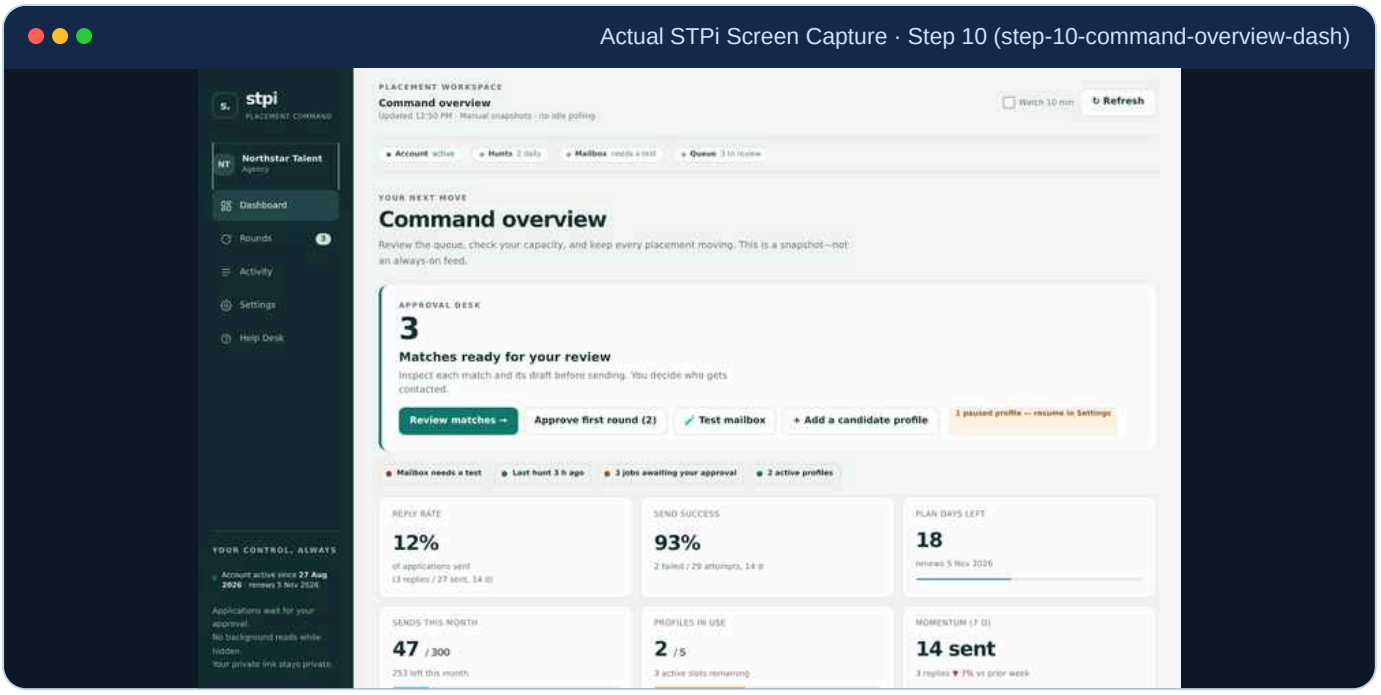

Part 3 · Daily Operation: Reviewing, Approving & Tracking

STEP 10 OF 16

Your Daily Command Overview (#dash) — Status Strip, Quotas, Priority Queue & 14-Day Funnel

SOLO STUDIO SOVEREIGN DFY SETUP TRIAL

> **What you see on screen:** The **Overview** view (`#v-dash`) is your daily home screen. At a glance it shows your 4-pill status strip (`Account` , `Hunts` , `Mailbox` , `Queue`), monthly send & active profile capacity meters, the **Needs Approval** priority queue, and your **14-Day Send & Reply Analytics** chart.

STEP-BY-STEP INSTRUCTIONS

1. Open your `/t/<id>` workspace each morning (after the 06:00 and 10:00 SAST hunt rounds) or afternoon (after the 14:00 and 18:00 SAST rounds).
2. Check the top **Status Strip** and **Capacity Meters** (`Monthly sends used` , `Active profiles` , `Win / Reply rate`).
3. Review the **Needs Approval** cards right at the top of Overview: you can click any match card to inspect the full draft, or click **Approve & send** / **Pass** directly.
4. Need live updates while an action runs? Tick **Watch 10 min** in the top-right header (performs at most 10 bounded 60-second checks while the tab is visible; zero idle background polling).

REAL EXAMPLE · READING YOUR 14-DAY CONVERSION FUNNEL

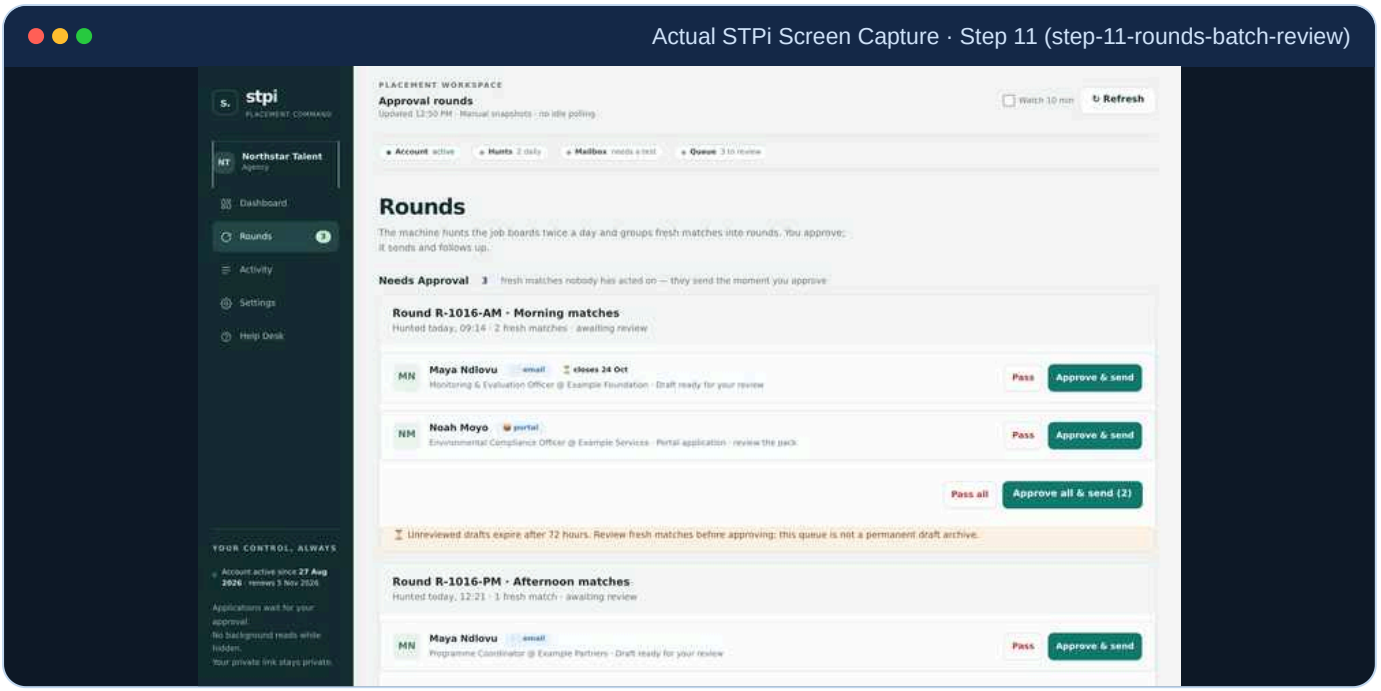

• Hunted: `29 matches` → Approved: `27` → Sent: `27` (93% send success) → Employer Replies: `3` (12% reply rate).
• If `Send failures` shows `1` , click the failed card to see why (e.g. mailbox password rotated) and click **Approve & retry**.

STEP 11 OF 16

Rounds View (#rounds) — Batch-Review Morning & Afternoon Hunt Matches

SOLO STUDIO SOVEREIGN DFY SETUP TRIAL DEMO

> **What you see on screen:** Clicking **Rounds** in the sidebar groups all researched job matches by hunt batch (`R-1018-AM · Morning matches` , `R-1018-PM · Afternoon matches`). Each card displays the candidate name, job title, employer, relevance score (`89%`), application route (`✉️ emailed application` vs `📦 portal apply pack`), and closing date countdown.

STEP-BY-STEP INSTRUCTIONS

1. Click **Rounds** in the navigation bar to see every open and recent hunt batch.
2. Notice the two application routes:
   1. ✉️ **Emailed application:** The job advert includes a recruitment email address. Tapping **Approve & send** emails the tailored cover letter, CV PDF, and attached certificates directly from your mailbox.
   2. 📦 **Portal apply pack:** The employer requires an online web form (e.g. Workday/SuccessFactors). STPi prepares the tailored PDF pack and cover letter so you can upload it in 30 seconds and click **Mark applied**.
3. Want to approve or skip an entire batch at once? Use **Approve all & send (n)** or **Pass all** on the round header.

REAL EXAMPLE · MORNING HUNT ROUND R-1018-AM

- Match 1: `Maya Ndlovu` → `Monitoring & Evaluation Officer @ Example Foundation` · `89% match` · `✉️ emailed application` · `Closes in 6 days` .

• Match 2: `Noah Moyo` → `Environmental Compliance Officer @ Example Services` · `84% match` · `📦 portal apply pack`.

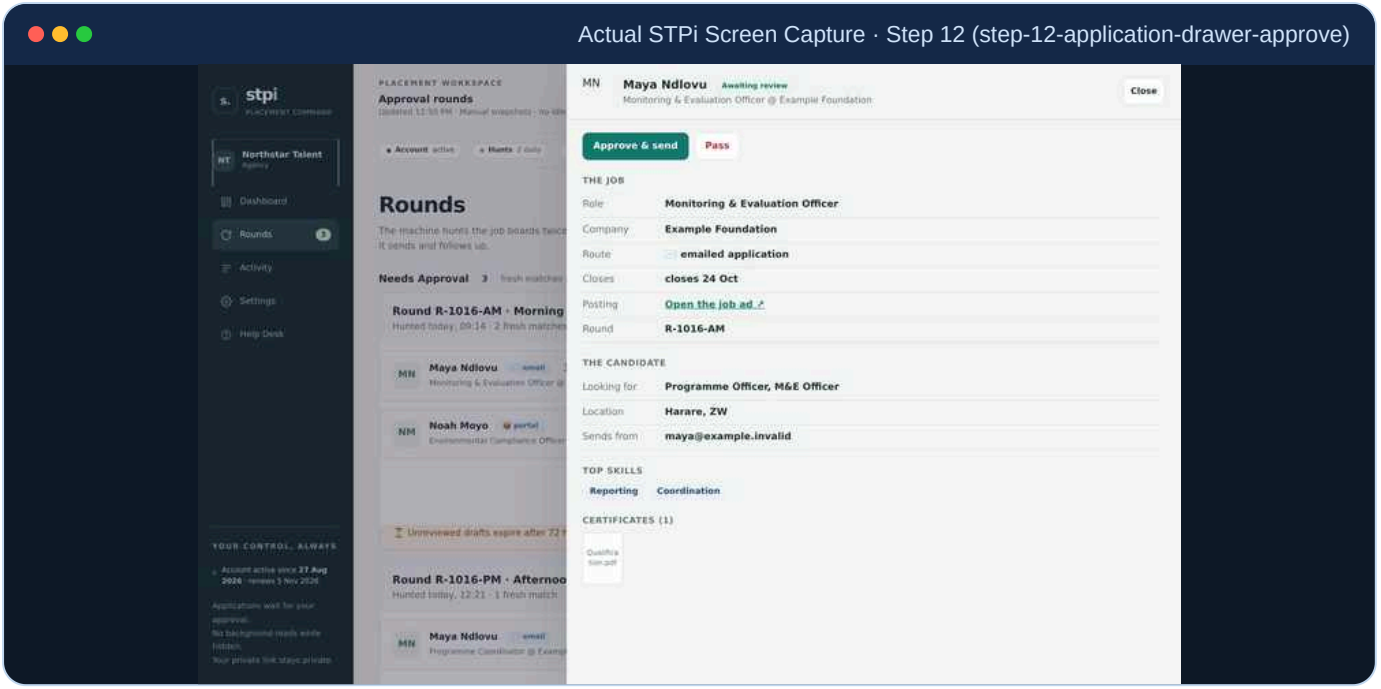

STEP 12 OF 16

Inspect the Application Drawer, Download Apply Packs & Tap Approve & Send

SOLO STUDIO SOVEREIGN DFY SETUP TRIAL DEMO

> **What you see on screen:** Clicking any match card in **Overview** or **Rounds** slides open the detailed **Application Inspection Drawer** (`#slide`). It shows the full tailored cover letter, recipient address, downloadable PDF apply pack, original job posting link, candidate profile summary, and the primary action buttons.

Actual STPi Screen Capture · Step 12 (step-12-application-drawer-approve)

STEP-BY-STEP INSTRUCTIONS

1. Click any match card to open the right-hand **Application Drawer**.
2. Read the tailored cover letter and verify the role details (`Open the job ad ↗` opens the live vacancy source).
3. Choose your action:
   • **Approve & send:** Immediately queues the email send (dispatches `decide.yml` and delivers via your SMTP mailbox within ~60 seconds).
   • **Pass:** Permanently skips this vacancy and deletes its temporary draft PDFs.
   • **Copy letter / Download PDFs + Mark applied (Portal route):** For portal vacancies, download the tailored CV PDF, click **Copy letter**, submit on the employer's portal, and click **Mark applied**.

REAL EXAMPLE · THE GOLDEN RULE OF STPI

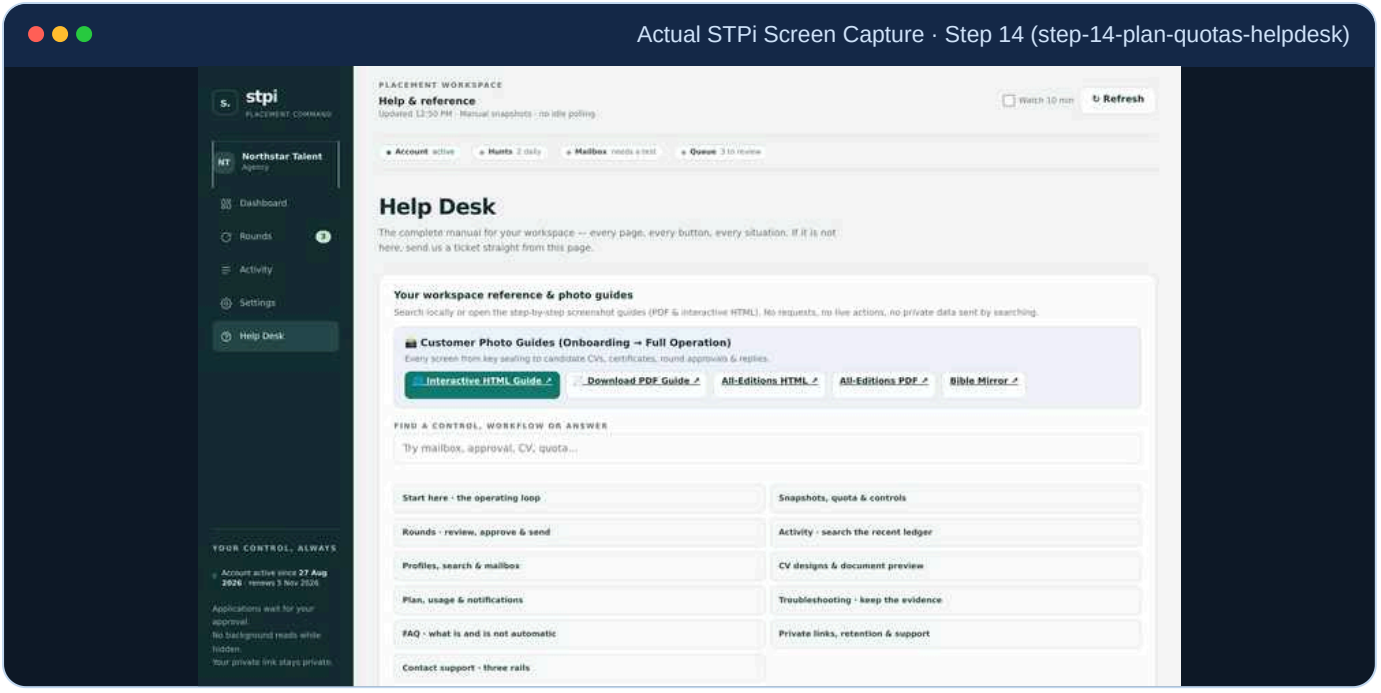

Nothing ever sends without your explicit tap on **Approve & send**. Unreviewed drafts automatically expire and purge their temporary PDFs after 72 hours so stale jobs never clutter your queue.

STEP 14 OF 16

Manage Your Plan, Notifications, Reference Search & 3-Rail Support Desk (#help)

SOLO STUDIO SOVEREIGN DFY SETUP TRIAL

> **What you see on screen:** In **Settings → Plan** and **Help**, you can inspect your active subscription tier, renewal date, and one-tap Whop upgrade cards (in Rand or USD, monthly or annual), toggle notification switches, open your Customer Photo Guides, or send a support ticket via Email, WhatsApp, or Discord.

STEP-BY-STEP INSTRUCTIONS

1. **Upgrading Your Plan:** In **Settings → Your plan**, click **Get Solo / Studio / Sovereign** (in Rands or USD). Always use the **same checkout email** so your workspace upgrades in place automatically.
2. **Notification Switches:** Toggle **Email me new rounds**, **Also notify me in Discord**, or **Weekly digest** — each switch saves instantly.
3. **Instant Workspace Reference (`#help`):** Click **Help** in the sidebar and type any keyword (`mailbox` , `certificates` , `CV` , `quota`) into **Find a control, workflow or answer** for instant offline answers.
4. **Submit a Support Ticket:** Fill out **Subject**, **Urgency**, and **What happened?** at the bottom of **Help**, then click **Send via Email ↗**, **Send via WhatsApp ↗** (`+263 78 460 0904`), or **Send via Discord**.

REAL EXAMPLE · SAFE SUPPORT HANDOFF

When you click **Send via Email** or **Send via WhatsApp**, STPi pre-fills your Client Name and Client ID (`Northstar Talent (northstar-4f8a)`) while automatically stripping your private `check_token` so your link stays secret.

STPi — Strengthen The People Initiative · Hosted Cloud & Self-Hosted Placement Engine across 21 African Markets & 35 Job Boards.
